17.	Wessex Water Scientific Centre	Mead Lane, Saltford, Bristol, BS31 3ER	UKAS No. 0905

Soil extractable P analysis

For soil extractable P analysis (only), Scheme Applicants and Scheme Members may rely upon analysis provided by third parties (e.g. farmers and agronomists); so long as they are satisfied with the source data e.g. have been provided with evidence of testing. In this scenario (of third party data provision) the analysis does not have to be provided by an ABL approved laboratory.

Note to all BAS Applicants, Members and Laboratories (either approved or seeking approval): please refer to the ABL Laboratory Protocols for conditions of approval that will become available in summer 2018.
